

Challenge #2: Help Bob Hokey Pokey

Problem:

Bob tried to do the Hokey Pokey like Livy had taught him, but there's not much room to turn oneself around in the narrow closet without hitting the walls.

Challenge:

Build a new closet that Bob may easily turn himself around in.

Criteria:

1. The closet must give Bob room to turn himself around with at least 6 inches of space on each side as he turns.
2. You must be able to use your hand to turn Bob around inside the newly built closet.

Constraints:

You may ONLY use Keva Planks to build with and a ruler to measure the space inside on each side.
